DOBINGAR GUIRYAMBAYE VINCENT

SKILLS

- **Technologies:** SQL, SSIS, SSAS, SSRS, ETL, SharePoint, IIS, Mapping (Eclipse HELIOS), SMSC, USSD, RBT, CBS, OCS, Provisioning, GSM / UMTS, Photoshop, Illustrator
- **Application servers:** Sqlserver 2008, 2012, Tomcat, Web-Logic, Sqserver 2012
- **Network:** CCNA IV
- **DBMS:** SQL server, Oracle, MySQL, PostgreSQL, Ingres, Access
- **Tools:** Visual studio 2008, 2012, 2015, 2017, 2019, Ms-Project, PHP, Adobe CC2021
- **Languages:** C#, .NET, JSF, Spring, Ajax, MVC5. IDE: Eclipse, Sun Creator Studio, J-Builder, Visual Basic, Java (Design Pattern)/J2EE, Servlet, JSP, PHP, .NET, XML/XSL, JDBC/ODBC, PL-SQL, SQL
- **Methods:** Merise, UML
- **Internet:** HTML, JavaScript, PHP, CSS, Flash

AREAS OF EXPERTISE

Database management:

- Administration of the Windows 2008 server environment under DWH
- Writing Transact-SQL queries
- Maintain a SQL 2012 database
- Develop SSIS (SQL Server Integration Services) packages to load data between DWH server and local department server
- Automation of daily work for data loading
- Strengthen data integrity using Master Data Services
- Purify data with Data Quality Services
- Install, configure and administer databases
- Manage physical and logical database storage space
- Ensure the integrity of data stored in databases
- Set up backup plans
- Implement solutions to maintain service continuity
- Maintain data access performance
- Participate in the training of the company's users

Development of computer applications:

- Development of an interface for entering and processing invoices in C # with .net and MVC
- Automated reporting dashboard to read daily revenue trend with SSRS
- Automated reporting dashboard to read hourly earnings trend with SSRS
- Automated reporting dashboard to read hourly voice, data and roaming trend with SSRS
- Automated reporting dashboard for MFS (Mobile Financial Services) daily trend with SSRS
- Automatic pay slip generation with SharePoint
- Develop an interface for inserting and updating data under C#
- Develop the management of mobile credit interfaces under Visual Basic

- Développement d'un menu d'envoi de données par téléphone vers le serveur
 - Develop a Java application for the management of bank credits (servlet, jsp)
- Computer and network maintenance:

- Raising / transporting PCs, servers, printers and associated peripherals
- Connect/disconnect and maintain computer equipment
- Installation and maintenance of different workstations or specialized in certain applications
- Installation of computer network
- Routing and fitting cables around desks, cabinets, etc.
- Professional email facility
- Network rights enforcement, file sharing, access restrictions
- Installation of a server under Windows 2003 Server and Windows 2008 Server
- Use of different control software (stability of the machine, of the network)

Project management:

- Partner with project manager to ensure project methodology is applied and followed
- Collect, monitor and consolidate project progress, costs and schedule
- Maintains internal and external project spend, outlook and engagement
- Identify areas of deviation from the plan and propose corrective actions
- Prepare monthly stewardship reports and other executive level summaries
- Ensure budgets and spending authorizations are properly approved before financial obligations are incurred
- Provide internal financial control support for procurement, cost reporting and audits
- Work closely with customers or suppliers to proactively identify and mitigate potential project issues or risks.
- Manage the project change request process and monitor the use of contingencies

Management control:

- Check the documentation of payment transactions in accordance with the procedure in place
- Check the quality / price ratios of the realizations
- Check the regularity of the operations of the statements of bank reconciliations
- Check the management of equipment in accordance with the standards in force
- Check the list of suppliers and their administrative documents

EXPERIENCE
