Bujumbura Marine, Burundi

Educations

- Master (Computer Science) : 2010
- BA (Computer Science) : 2007

Skills

- Business Intelligence & Data Analytics
- Data Management & ETL
- Software Development
- Reporting and Dashboard automation
- Database & System integration
- Project Planning & Execution
- Risk assessment & Compliance
- Business Analysis
- Fraud prevention strategy
- Financial & Risk management
- Costumer & Stakeholder Engagement
- Strategy thinking & Decision - Making
- Strong communication & Collaboration
- Problem solving & critical analysis
- Adaptability & continuous learning

Project handled

- Regulatory Audit – Burundian Telecom Operators and Mobile Money Providers
- Revenue Validation system – NP Holding
- SYGUAR (Mobile Tax payment System) – Chad Finance Ministry
- CMS Freelancer Payment – Millicom Chad
- Bipcall Management System – Millicom Chad
- Freelancer Management System – Millicom Chad

Professional Summary

Information Management & Reports Specialist | Data Analytics | Project Management

Results-driven Information Management & Reports Specialist with extensive experience in data analytics, business intelligence, and project management. Proven expertise in Power BI, SSRS, SQL, and ETL processes, with a strong background in telecommunications, regulatory compliance, and software development. Adept at designing and automating dashboards, managing data integration, and optimizing reporting systems. Experienced in leading secure data-sharing initiatives, overseeing billing control and revenue assurance, and implementing fraud prevention strategies. Strong stakeholder engagement, team management, and process improvement skills. Holds a Master's in Computer Science and multiple certifications in data analytics, project management, and risk assessment.

Experience

July'2023 - Now

Sr. IN, VAS & MFS Consultant NP Holding (ARCT -Telecom Regulator) | Burundi

- Design & Automation: Develop and automate dashboards and reports using DAX, SSRS, Power BI, and Power Query to enhance data visualization and decision-making.
- Data Modeling & ETL: Design, develop, and maintain data models and ETL processes to streamline data integration and processing.
- User Collaboration: Work closely with end-users to gather requirements, provide technical support, and ensure solutions align with business needs.
- System Configuration: Configure and optimize systems according to technical procedures and best practices to improve efficiency and accuracy.
- Process Optimization: Continuously enhance data reporting, automation, and business intelligence processes for better operational insights.
- Prevention strategies, business reviews & compliance with C/E-level executives.
- Project Management: Plan, execute, and oversee data-driven projects, ensuring timely delivery, resource allocation, and alignment with business goals.
- Process Optimization: Continuously enhance data reporting, automation, and business intelligence processes for better operational insights.

Jan'2018 – July '2023

Partner, Project Manager

SALY SYSTEM (Software Development and Entrep.)

- Project Management: Oversee the IGL payment project at the Finance Ministry of Chad, ensuring efficient execution, budget management, and compliance with financial regulations. Utilize Gantt charts, Planner, Excel project plans, and meeting plans for structured project execution.
- Reporting & Automation: Design and automate reports for driving applications, enhancing efficiency, accuracy, and decision-making.
- Stakeholder & Team Management: Manage meetings with key stakeholders and teams using task tracking, Planner, and Copilot to ensure seamless communication and project alignment.
- Software Development & Data Integration: Lead software development projects, integrating Oracle, SQL Server, PostgreSQL, Python, and web technologies (HTML, CSS, JavaScript, Node.js) for scalable solutions.
- Training & Capacity Building: Conduct training sessions on entrepreneurship, database management, and professional office tools, enhancing team skills and productivity.
- Customer & Commercial Management: Oversee customer acquisition, relationship management, and customer loyalty strategies, ensuring business growth and retention.

Systems Exposure

- Business Intelligence & Reporting: Power BI, DAX, SSRS, Power Query
- Databases & Data Integration: Oracle, SQL Server, PostgreSQL, ETL Processes
- Programming & Development: JavaScript, Node.js, REACT, Web3, EJS, Python, HTML, CSS, JavaScript
- Project Management & Collaborations Tools: Gantt Charts, Microsoft Planner, Excel Project Plans, Copilot, Miro
- Automation & Optimization: Report & Dashboard Automation Process Optimization Strategies
- System Configuration & Administration

Achievements

- Designed and implemented **Power BI** dashboards that enhanced **decision-making** and operational efficiency.
- Automated reporting processes using **DAX, SSRS, and Power Query**, reducing manual effort by **50%**.
- Built and maintained **ETL pipelines** to streamline data flow across multiple platforms.
- Improved data processing efficiency, reducing latency by **30%**
- Successfully implemented **secure data-sharing frameworks**, ensuring compliance with **regulatory standards**
- Enhanced data security and governance in **telecommunications and financial operations**
- Developed automated billing control systems, ensuring accurate invoicing and **eliminating revenue leaks**.
- Provided training on **data analytics, business intelligence, and risk management**, upskilling over **100 professionals**
- Ensured **full regulatory compliance** in data management within the **telecom sector**.

Certifications

- Data Analysis (Excel, DAX, PowerBi & SPSS)
- Project Management
- Full stack web development

March'2021 – April'2021

Consultant

Food and Agriculture Organization (FAO)

- Technical Research & Evaluation: Conduct an in-depth analysis of technical solutions for building a secure data-sharing platform, comparing various approaches while leveraging existing systems like RSU and SCOPE.
- Data Security & Standardization: Define protocols and security measures for data sharing between partners, ensuring compliance with privacy regulations, encryption standards, and access control mechanisms.
- Platform Development & Implementation: Design and develop a national-level secure platform for data storage, sharing, and analysis, integrating secure authentication, role-based access, and automated data processing.
- Testing & Optimization: Conduct pilot testing of the platform and sharing protocols in Chad, identifying potential vulnerabilities and optimizing system performance based on real-world feedback.
- Documentation & Case Study Development: Prepare a detailed case study based on testing results, outlining key findings, lessons learned, and recommendations for scaling the solution nationwide.

Aprt'2015 – Mar'2018

Business Architect & Revenue Assurance and Billing Analyst

Millicom – Chad

- Develop and maintain business capability models that align with organizational strategy.
- Partner with executives and stakeholders to define business goals and translate them into architectural solutions.
- Identify opportunities for business transformation and digital innovation.
- Billing & Revenue Assurance: Oversee billing control for prepaid services, roaming, and interconnections, ensuring accuracy and compliance with telecom regulations.
- Revenue Monitoring & Reporting: Develop SSRS reports to track revenue, interconnection performance, and roaming transactions, providing actionable insights for financial optimization.
- Automation & Process Improvement: Design and implement automated SSRS reports for monitoring mobile activations and MFS (Mobile Financial Services) registration, reducing manual effort and improving data accuracy.
- SharePoint Process Development: Develop and maintain SharePoint-based workflows to streamline billing controls, revenue assurance, and reporting processes, enhancing efficiency and accountability.

Oct'2013 – Mar'2015

CMS Administrator & Acquisition Technical Support

Millicom – Chad

- Project Management & Technical Support: Provide end-to-end management and support for Beep call and Hybrid projects, ensuring successful implementation, monitoring, and optimization of telecom services.
- Data Modeling & ETL Development: Design, develop, and maintain robust data models and ETL pipelines using SQL Server (SSIS, SSAS, SSRS), Oracle (PL/SQL, Oracle BI), and other integration tools to improve data processing and accuracy.
- Automated Reporting & Performance Tracking: Develop and deploy IIS-based automated reports to track mobile activations and MFS (Mobile Financial Services) registrations, enabling real-time monitoring and efficient decision-making.
- Data Analysis & Business Intelligence: Utilize SSRS, Power BI, and SQL-based analytics to interpret telecom and financial data, providing actionable insights for revenue assurance, fraud detection, and service improvements.
- System Integration & Optimization: Ensure seamless data integration across SQL Server, Oracle, and Java (JDBC) environments, enhancing system performance, reducing latency, and improving data consistency.
- Process Automation & Efficiency Enhancement: Implement automated workflows and data validation mechanisms to streamline business processes, reducing manual intervention and operational risks.
- Project Planning & Execution: Utilize Excel and MS Project for efficient project planning, task tracking, and resource allocation, ensuring timely delivery and alignment with strategic goals
