Hiring Manager
Ecobank Chad

Dear Hiring Manager,

I am writing to express my strong interest in the Full Stack Developer position at Ecobank Chad. With over a decade of experience leading software development projects, designing data solutions, and ensuring regulatory compliance within both the financial and telecommunications sectors, I am confident in my ability to contribute meaningfully to your digital transformation objectives.

Throughout my career, I have successfully led and developed end-to-end applications tailored to business needs—most recently as a Project Manager and Partner at SALY SYSTEM, where I delivered custom software solutions to institutional clients. My background also includes a role as a Secure Platform Consultant with the FAO, where I developed Power BI dashboards for monitoring international development projects, and as a Business Intelligence Analyst at Millicom (Tigo), where I automated reporting systems and implemented ETL pipelines for strategic decision-making.

I bring a robust technical stack including Node.js, Express, JavaScript, PostgreSQL, React, and Power BI, complemented by a deep understanding of compliance, data privacy, and quality assurance standards—essential in the banking sector. My ability to work across diverse teams, communicate technical concepts clearly, and deliver high-impact solutions aligns well with Ecobank's mission of financial inclusion and innovation across Africa.

I am particularly motivated by Ecobank's pan-African footprint and its commitment to leveraging technology for inclusive banking services. I am eager to bring my skills, adaptability, and results-driven mindset to your dynamic IT team.

Thank you for considering my application. I would welcome the opportunity to discuss how my background and aspirations align with Ecobank's digital vision. I am available at your convenience for an interview.

Sincerely,
Vincent Guiryambaye Dobingar
